

NEWS - 2019 - NO. 6

New Conveyor Belt Cleaner „Retractable Side Service (RS)“

-  Quick and safe maintenance performed from outside the chute
-  Simple blade change
-  Minimal pull-out forces required
-  No bar removal low required hence space requirement
-  Decreased downtimes
-  Increased productivity
-  Multifunctional combination with tungsten carbide segments from existing modular STARCLEAN® systems
-  „Industrie 4.0“ ready by optional electric drive of the tensioning device
-  Suitable for reversible belt installations (with the electric drive)

STEP BY STEP

- 1 Scrapper in working position
- 2 Scrapper rolled back
- 3 Release the positioning bracket
- 4 Optional use of the segment extraction tool and lateral removal of the segments
- 5 Remove scrapper blades one at a time
- 6 Remove the last scrapper blade, replace blades and reassemble in reverse
